

QASR

Quality Assurance Systems
Requirements Plan

Why QASR?

- CERP has 11 programs - includes RECOVER
- 40 projects
- Many Many Partners

QASR

- Current scenario - each sampling or analytical entity/agency that is/will be involved in CERP operates from its own QA Manual.
- Under current scenario, will have difficulty when amass the data to evaluate regional environmental progress.
- Plan is to develop a single Quality Assurance Manual for CERP that will be used by project teams and RECOVER.

QASR

- QA Manual will cover all aspects of sample collection, laboratory analysis and data review and acceptance criteria.
- Incorporates lab Round Robin programs - frequency, evaluation and corrective action
- Field sampling assessments - audits, blind field QC samples

QASR

- Includes Data Quality Objectives - usability assessment, Minimum Detection Limits, QA targets
- Describes data management/assessment philosophy - data review process, frequency of data assessments

QASR

- For Project Managers - provides a single point of reference and guide for monitoring and evaluating project's success.
- For RECOVER - ensures data comparability is achieved for assessment of regional CERP progress.

QASR

- Chapter 1: Introduction
- Chapter 2: Water Quality Field Sampling
- Chapter 3: Water Quantity
- Chapter 4: Remote Sensing
- Chapter 5: Biological Sampling
- Chapter 6: Laboratory Analysis
- Chapter 7: Data Management, Verification and Validation

QASR

- Draft will be out in mid-April
- Web page:
www.evergladesplan.org
- Review period about 1 month
